Subtraction

Subtraction in mathematics means you are taking something away from a group or number of things. When you subtract, what is left in the group becomes less. An example of a subtraction problem is the following: $5 - 3 = 2$.

Example 1

5 apples take away 3 apples = 2 apples left

Example 2

| Tens | units |
|------|-------|
| 3 | 8 |
| - 1 | 5 |
| 2 | 3 |

Example 3

Always remember any number – the same number = 0

$$8 - 8 = 0$$
